-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply,

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 7.5 been renumbered as 8, therefore all the claims will be renumbered as 1-15; Also, claim 13 depends on claim 9 and claim 14 depends on claim 10.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Chan et al (5762076).

With regard to claims 1-5, Chan et al discloses a hair device (fig. 1) comprising a top concave upper portion (12, col. 2, lines 40-42) for gathering upper portion of hair in position and holding the hair in a desired position, a lower portion (10) having at least

Art Unit: 3732

two teeth (180, 18P) for combing action and holding larger amounts of hair in place, wherein the lower portion being at least as long as the upper portion.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chan et al in view of Solomon (3595249).

With regard to claims 6-15, Chan et al discloses a hair device comprising all the claimed limitations in claims 1 as discussed above except for the upper and lower portions being flexible and hingedly connected together and a plurality of rigid interior attached to the upper portion. Solomon discloses a hair device (fig. 1) comprising an upper portion (12) and a lower portion (18) being made of flexible material (col. 2, line 52) and the upper portion having a plurality of interior teeth (38'). It would have been obvious to one having an ordinary skill in the art at the time the invention was made to employ the flexible material as taught by Solomon into the hair device of Chan et al for the purpose of gripping the hair. It would have been obvious to one having an ordinary skill in the art at the time the invention was made to employ the rigid teeth, since it has

Art Unit: 3732

been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Thatcher, Renstrom et al, Waggner and Criscuolo are cited to show the state of the art with respect to a hair device.

The drawings filed 11/15/2004 have been approved by the Examiner.
